

Fund Objective

The State Street Aggregate Bond Index Fund (the "Fund") seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of an index that tracks the U.S. dollar denominated investment grade bond market over the long term.

Process

The Fund seeks to achieve its investment objective by investing substantially all of its investable assets in the Aggregate Bond Index Portfolio, which has substantially similar investment policies to the Fund when the Fund invests in this "master-feeder" structure, the Fund's only investments are shares of the Portfolio and it participates in the investment returns achieved by the Portfolio. Under normal circumstances, at least 80% of the Fund's net assets will be invested (either on its own or as a part of a master/feeder structure) in securities comprising the Bloomberg Barclays U.S. Aggregate Bond Index (the "Index") or in securities that SSGA Funds Management, Inc. (the "Adviser") determines have economic characteristics that are comparable to the economic characteristics of securities that comprise the Index. The Fund is not managed according to traditional methods of "active" investment management, which involve the buying and selling of securities based upon economic, financial and market analysis and investment judgment. In seeking to track the performance of the Index, the Fund employs a sampling strategy, which means that the Fund will not typically purchase all of the securities represented in the Index. Instead, the Fund may purchase a subset of the securities in the Index, or securities the Adviser considers to be comparable to securities in the Index, in an effort to hold a portfolio of securities with generally the same risk and return characteristics of the Index. The number of holdings in the Fund will be based on a number of factors, including asset size of the Fund. The Adviser generally expects the Fund to hold fewer than the total number of securities in the Index, but reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Key Features

- Broad exposure to government bonds, investment grade corporate bonds, mortgage pass-through securities, commercial mortgage backed securities, and other asset backed securities that are publicly for sale within the U.S. fixed income markets.
- Managed by an industry leader in index solutions

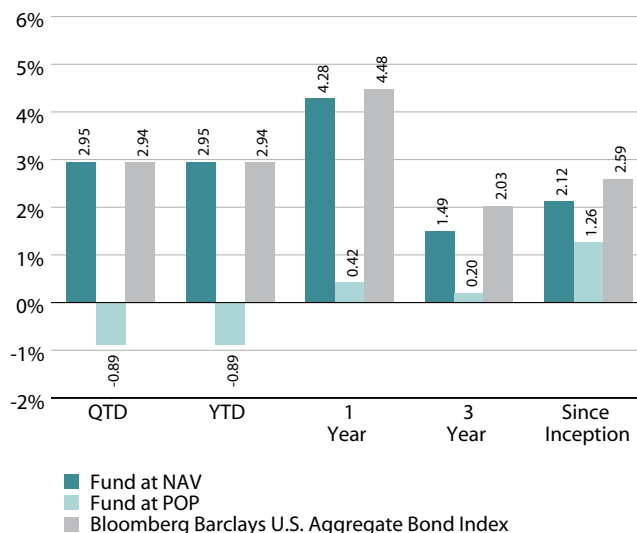

Total Return

Maximum Sales Charge	3.75%
CDSC	1.00%

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit ssgafunds.com for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index.

Performance vs Benchmark

[^]The Fund's investment adviser, SSGA Funds Management, Inc. is contractually obligated until April 30, 2020 (i) to waive up to the full amount of the advisory fee payable by the Fund and/or (ii) to reimburse the Fund for expenses to the extent that Total Annual Fund Operating Expenses (exclusive of non-recurring account fees, extraordinary expenses, acquired fund fees and any class-specific expenses, such as distribution, shareholder servicing, sub-transfer agency and administration fees) exceed 0.025% of average daily net assets on an annual basis. This waiver and/or reimbursement may not be terminated prior to April 30, 2020 except with approval of the Fund's Board of Trustees.

Definitions: NAV is the market value of a mutual fund's and ETFs total assets, minus liabilities, divided by the number of shares outstanding. **Portfolio Duration** is an option-adjusted measure of a bond's (or portfolio's) sensitivity to changes in interest rates. Calculated as the average percentage change in a bond's value (price plus accrued interest) under shifts of the Treasury curve +/- 100 bps. Incorporates the effect of embedded options for corporate bonds and changes in prepayments for mortgage-backed securities. **Public Offering Price (POP)** - POP is equal to a Fund's Net Asset Value plus sales charges, if any. As with the Net Asset Value, the public offering price (POP) will typically change on a day to day basis.

Important Risk Information:

Derivative investments may involve risks such as potential illiquidity of the markets and additional risk of loss of principal.

The values of **debt securities** may decrease as a result of many factors, including, by way of example, general market fluctuations; increases in interest rates; actual or perceived inability or unwillingness of issuers, guarantors or liquidity providers to make scheduled principal or interest payments; illiquidity in debt securities markets; and prepayments of principal, which often must be reinvested in obligations paying interest at lower rates. Investments in mortgage securities are subject to prepayment risk, which can limit the potential for gain during a declining interest rate environment and increase the potential for loss in a rising interest rate environment.
