SSGA Funds

State Street Disciplined Emerging Markets Equity Fund

Summary Prospectus – December 19, 2018

Class A SSELX

Class I SSEOX

Class K SSEQX

Before you invest, you may want to review the fund's prospectus, which contains more information about the fund and its risks. You may find the fund's prospectus and other information about the fund online at:

<http://ssgafunds.com/resources/materials/productLiteratureOverlay.seam>

You also may get this information at no cost by calling (800) 997-7327 or by sending an e-mail request to fund_inquiry@ssga.com. The fund's current prospectus and statement of additional information are incorporated by reference into this summary prospectus.

Investment Objective

State Street Disciplined Emerging Markets Equity Fund (the "Fund") seeks to provide maximum total return, primarily through capital appreciation, by investing primarily in securities of foreign issuers.

Fees and Expenses of the Fund

The tables below describe the fees and expenses that you may pay if you buy and hold shares of the Fund ("Fund Shares"). You may qualify for sales charge discounts on purchases of Class A shares if you agree to invest in the future, or if you and your family currently invest, at least \$50,000 in State Street Funds that offer Class A shares. More information about these and other discounts is available from your financial professional and in the "Investing in State Street Funds Shares" section on page 41 of the Fund's Prospectus.

Shareholder Fees (fees paid directly from your investment)

	<u>Class A</u>	<u>Class I</u>	<u>Class K</u>
Maximum Sales Charge (Load) Imposed On Purchases (as a percentage of offering price)	5.25%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the net asset value) ¹	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	<u>Class A</u>	<u>Class I</u>	<u>Class K</u>
Management Fees	0.75%	0.75%	0.75%
Distribution and Shareholder Service (12b-1) Fees	0.25%	0.00%	0.00%
Other Expenses ²	0.82%	0.82%	0.62%
Total Annual Fund Operating Expenses	1.82%	1.57%	1.37%
Less Fee Waivers and/or Expense Reimbursements ³	(0.37%)	(0.37%)	(0.37%)
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements	<u>1.45%</u>	<u>1.20%</u>	<u>1.00%</u>

¹ A contingent deferred sales charge ("CDSC") of 1.00% may be assessed on redemptions of Class A shares made within 18 months after purchase where no initial sales charge was paid at the time of purchase as part of an investment of \$1,000,000 or more.

² "Other expenses" have been restated to reflect current fees.

³ The Fund's investment adviser, SSGA Funds Management, Inc. (the "Adviser" or "SSGA FM"), is contractually obligated until December 31, 2019 (i) to waive up to the full amount of the advisory fee payable by the Fund, and/or (ii) to reimburse the Fund to the extent that Total Annual Fund Operating Expenses (exclusive of non-recurring account fees, extraordinary expenses, acquired fund fees and expenses, and distribution, shareholder servicing and sub-transfer agency fees) exceed 1.00% of average daily net assets on an annual basis. This waiver and/or reimbursement may not be terminated prior to December 31, 2019 except with the approval of the Fund's Board of Trustees. SSGA FM has contractually agreed to waive 0.01% of its administration fee. This waiver may not be terminated or modified except with the approval of the Fund's Board of Trustees.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, and then sell all of your Fund Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The calculation of costs for the one-year period takes into account the effect of any current contractual fee waivers

State Street Disciplined Emerging Markets Equity Fund

Summary Prospectus – December 19, 2018

Class A SSELX

Class I SSEOX

Class K SSEQX

and/or reimbursements; and the calculation of costs for the remaining periods takes such fee waivers and/or reimbursements into account only for the first year of each such period. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>	<u>10 years</u>
Class A	\$665	\$1,033	\$1,426	\$2,521
Class I	\$122	\$ 459	\$ 820	\$1,836
Class K	\$102	\$ 397	\$ 715	\$1,614

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 51% of the average value of its portfolio.

Principal Investment Strategies

The Fund will invest at least 80% of its net assets (plus borrowings, if any) in equity securities issued by companies domiciled or doing a substantial portion of their business in countries determined by the Fund’s Adviser to have a developing or emerging economy or securities market. An emerging market is any market included in the MSCI® Emerging Markets Index (the “Index”), the Fund’s benchmark. The Fund considers a company to be doing a substantial portion of its business in countries that have a developing or emerging economy or securities market if (i) the company has at least 50% of its assets in one or more such countries; (ii) the company derives at least 50% of its revenues or profits from goods produced or sold, investments made, or services provided in one or more such countries; or (iii) the company’s securities are traded principally in an emerging market. The Fund will provide shareholders with at least sixty (60) days’ notice prior to any change in its 80% investment policy.

In seeking to identify stocks offering the potential for capital growth, the Adviser employs a proprietary quantitative process. The process evaluates the relative attractiveness of eligible securities based on the correlation of certain historical economic and financial factors (such as measures of growth potential, valuation, quality and investor sentiment) and based on other historical quantitative metrics. Additionally, the process may incorporate an element designed to evaluate the macroeconomic environment and prevailing market conditions. The process is intended to allow the Adviser to evaluate eligible securities and then rank eligible securities in the Fund’s investment universe in the order of their attractiveness as potential Fund investments.

The Adviser also uses a quantitative analysis to determine the expected volatility of a stock’s market price. Volatility is a statistical measurement of up and down fluctuations in the value of a security over time. Volatility may result in rapid and dramatic price swings. The Adviser seeks to favor securities with low exposure to market risk factors and low security-specific risk. In determining the exposure of a security to such risk factors, the Adviser may take into account, among other things, such considerations as a security’s market capitalization, its price momentum, the security’s valuation, the liquidity of the security, the degree to which the issuer is leveraged, and the issuer’s growth prospects. The Adviser also implements risk constraints at the overall portfolio level focusing on such factors as industry and sector exposures, market capitalization exposure, and geographic exposures.

Through these quantitative processes of security selection and portfolio diversification, the Adviser expects that the portfolio will be subject to a relatively low level of absolute risk (as defined by statistical measures of volatility, such as standard deviation of returns) and should exhibit relatively low volatility compared with the Index over the long term. The Adviser may make changes over time in the Fund’s portfolio to reflect changes in one or more of the various risk factors described above. From time to time, the Adviser may make a qualitative judgment not to implement fully the results of the quantitative investment process if it believes that the process did not take into account all of the information relevant to a particular investment or the Fund’s portfolio in the aggregate, or that a different investment might be more appropriate. There can be no assurance that the Fund will in fact achieve any targeted level of volatility or experience lower volatility than the Index, nor can there be any assurance that the Fund will produce returns in excess of the Index.

State Street Disciplined Emerging Markets Equity Fund

Summary Prospectus – December 19, 2018

Class A SSELX

Class I SSEOX

Class K SSEQX

The Fund expects to invest primarily in common stocks. The Fund may purchase securities in their initial public offerings, and may hold securities that are restricted as to resale. The Fund may invest in other investment companies, including exchange-traded funds, to the extent permitted by applicable law (including those advised by the Adviser). The Fund may hold a portion of its assets in cash and cash instruments. While the Fund may invest in companies of any market capitalization, it expects to primarily invest in large capitalization companies. The Fund also may lend its securities and engage in active trading.

The Fund may invest in derivatives, such as futures contracts and total return swaps, in order to gain broad equity market exposures pending investments of cash, or to reduce market exposures pending the sales of securities. The Fund may enter into foreign currency futures, forward contracts, and options to hedge currency risk, although the Adviser does not currently anticipate that such transactions will play any significant role of the investment process.

Principal Risks

You could lose money by investing in the Fund. **An investment in the Fund is subject to investment risks, including possible loss of principal, is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.** The Fund may not achieve its investment objective. General risks associated with the Fund's investment policies and investment strategies are discussed below. The Fund is not intended to be a complete investment program, but rather is intended for investment as part of a diversified investment portfolio. Investors should consult their own advisers as to the role of the Fund in their overall investment programs.

In addition, the Fund is subject to the following risks:

Banking Companies Risk: The performance of bank stocks may be affected by extensive governmental regulation which may limit both the amounts and types of loans and other financial commitments they can make, and the interest rates and fees they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds, and can fluctuate significantly when interest rates change. Credit losses resulting from financial difficulties of borrowers can negatively impact banking companies. Banks may also be subject to severe price competition. Competition is high among banking companies and failure to maintain or increase market share may result in lost market value.

Counterparty Risk: The Fund will be subject to credit risk with respect to the counterparties with which the Fund enters into derivatives contracts, repurchase agreements, reverse repurchase agreements, and other transactions. If a counterparty fails to meet its contractual obligations, the Fund may be unable to terminate or realize any gain on the investment or transaction, or to recover collateral posted to the counterparty, resulting in a loss to the Fund. If the Fund holds collateral posted by its counterparty, it may be delayed or prevented from realizing on the collateral in the event of a bankruptcy or insolvency proceeding relating to the counterparty.

Currency Risk: The value of the Fund's assets may be affected favorably or unfavorably by currency exchange rates, currency exchange control regulations, and delays, restrictions or prohibitions on the repatriation of foreign currencies. Foreign currency exchange rates may have significant volatility, and changes in the values of foreign currencies against the U.S. dollar may result in substantial declines in the values of the Fund's assets denominated in foreign currencies.

Depository Receipts Risk: Investments in depository receipts may be less liquid and more volatile than the underlying securities in their primary trading market. If a depository receipt is denominated in a different currency than its underlying securities, the Fund will be subject to the currency risk of both the investment in the depository receipt and the underlying security. Holders of depository receipts may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the receipts to take action. The prices of depository receipts may differ from the prices of securities upon which they are based.

Derivatives Risk: Derivative transactions can create investment leverage and may have significant volatility. It is possible that a derivative transaction will result in a much greater loss than the principal amount invested, and the Fund may not be able to close out a derivative transaction at a favorable time or price. The counterparty to a derivatives contract may be unable or unwilling to make timely settlement payments, return the Fund's margin, or otherwise honor its obligations. A derivatives transaction may not behave in the manner anticipated by the Adviser or may not have the effect on the Fund anticipated by the Adviser.

State Street Disciplined Emerging Markets Equity Fund

Summary Prospectus – December 19, 2018

Class A SSELX

Class I SSEOX

Class K SSEQX

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, greater volatility in currency exchange rates, less developed securities markets, possible trade barriers, currency transfer restrictions, a more limited number of potential buyers and issuers, an emerging market country's dependence on revenue from particular commodities or international aid, less governmental supervision and regulation, unavailability of currency hedging techniques, differences in auditing and financial reporting standards, and less developed legal systems. There is also the potential for unfavorable action such as expropriation, nationalization, embargo, and acts of war. The securities of emerging market companies may trade less frequently and in smaller volumes than more widely held securities. Market disruptions or substantial market corrections may limit very significantly the liquidity of securities of certain companies in a particular country or geographic region, or of all companies in the country or region. The Fund may be unable to liquidate its positions in such securities at any time, or at a favorable price, in order to meet the Fund's obligations. These risks are generally greater for investments in frontier market countries, which typically have smaller economies or less developed capital markets than traditional emerging market countries.

Equity Investing Risk: The market prices of equity securities owned by the Fund may go up or down, sometimes rapidly or unpredictably. The value of a security may decline for a number of reasons that may directly relate to the issuer and also may decline due to general industry or market conditions that are not specifically related to a particular company. In addition, equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Financial Sector Risk: Financial services companies are subject to extensive governmental regulation which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the financial sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations. Credit losses resulting from financial difficulties of borrowers and financial losses associated with investment activities can negatively impact the sector. Insurance companies may be subject to severe price competition. Adverse economic, business or political developments could adversely affect financial institutions engaged in mortgage finance or other lending or investing activities directly or indirectly connected to the value of real estate.

Futures Contract Risks; Other Exchange-Traded Derivatives: The risk of loss relating to the use of futures contracts and other exchange-traded derivatives is potentially unlimited. There is no assurance that a liquid secondary market on an exchange will exist for any particular futures contract or other exchange-traded derivative or at any particular time. In the event no such market exists for a particular derivative, it might not be possible to effect closing transactions, and the Fund will be unable to terminate its exposure to the derivative. If the Fund uses futures contracts or other exchange-traded derivatives for hedging purposes, there is a risk of imperfect correlation between movements in the prices of the derivatives and movements in the securities or index underlying the derivatives or movements in the prices of the Fund's investments that are the subject of such hedge. Certain foreign futures contracts and other exchange-traded derivatives may be less liquid and more volatile than U.S. contracts. The Fund may be delayed or prevented from recovering margin or other amounts deposited with a futures commission merchant or futures clearinghouse.

Geographic Focus Risk: The performance of a fund that is less diversified across countries or geographic regions will be closely tied to market, currency, economic, political, environmental, or regulatory conditions and developments in the countries or regions in which the fund invests, and may be more volatile than the performance of a more geographically-diversified fund.

Growth Stock Risk: The prices of growth stocks may be based largely on expectations of future earnings, and their prices can decline rapidly and significantly in reaction to negative news. Growth stocks may underperform value stocks and stocks in other broad style categories (and the stock market as a whole) over any period of time and may shift in and out of favor with investors generally, sometimes rapidly, depending on changes in market, economic, and other factors.

State Street Disciplined Emerging Markets Equity Fund

Summary Prospectus – December 19, 2018

Class A SSELX

Class I SSEOX

Class K SSEQX

IPO Risk: The Fund may at times have the opportunity to invest in securities offered in initial public offerings (“IPOs”). IPOs involve companies that have no public operating history and therefore entail more risk than established public companies. The prices of securities offered in IPOs can have significant volatility and the Fund may lose money on an investment in such securities. IPO investments in which other clients of the Adviser invest may not be made available to the Fund.

Large-Capitalization Securities Risk: Returns on investments in securities of large companies could trail the returns on investments in securities of smaller and mid-sized companies. Larger companies may be unable to respond as quickly as smaller and mid-sized companies to competitive challenges or to changes in business, product, financial, or other market conditions. Larger companies may not be able to maintain growth at the high rates that may be achieved by well-managed smaller and mid-sized companies.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund’s holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. In addition, the Fund, due to limitations on investments in any illiquid securities and/or the difficulty in purchasing and selling such investments, may be unable to achieve its desired level of exposure to a certain market or sector.

Management Risk: The Fund is actively managed. The Adviser’s judgments about the attractiveness, relative value, or potential appreciation of a particular sector, security, commodity or investment strategy or as to a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Adviser’s investment techniques and decisions will produce the desired results.

Market Risk: The Fund’s investments are subject to changes in general economic conditions, and general market fluctuations and the risks inherent in investment in securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, changes in the actual or perceived creditworthiness of issuers, and general market liquidity. The Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets.

Mid-Capitalization Securities Risk: The securities of mid-capitalization companies may be more volatile and may involve more risk than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies, and may depend on a few key employees. In addition, these companies may have been recently organized and may have little or no track record of success. The securities of mid-sized companies may trade less frequently and in smaller volumes than more widely held securities. Some securities of mid-sized issuers may be illiquid or may be restricted as to resale, and their values may be volatile.

Modeling Risk: The Adviser uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Adviser. There can be no assurance that the models will behave as expected in all market conditions. In addition, computer programming used to create quantitative models, or the data on which such models operate, might contain one or more errors.

Non-U.S. Securities Risk: Non-U.S. securities (including depositary receipts) are subject to political, regulatory, and economic risks not present in domestic investments. There may be less information publicly available about a non-U.S. entity than about a U.S. entity, and many non-U.S. entities are not subject to accounting, auditing, legal and financial report standards comparable to those in the United States. Further, such entities and/or their securities may be subject to risks associated with currency controls; expropriation; changes in tax policy; greater market volatility; differing securities market structures; higher transaction costs; and various administrative difficulties, such as delays in clearing and settling portfolio transactions or in receiving payment of dividends. Securities traded on foreign markets may be less liquid (harder to sell) than securities traded domestically. Foreign governments may impose restrictions on the repatriation of capital to the U.S. In addition, to the extent that the Fund buys securities denominated in a foreign currency, there are special risks such as changes in currency exchange rates and the risk that a foreign government could regulate foreign exchange transactions. In addition, to the extent investments are made in a lim-

State Street Disciplined Emerging Markets Equity Fund

Summary Prospectus – December 19, 2018

Class A SSELX

Class I SSEOX

Class K SSEQX

ited number of countries, events in those countries will have a more significant impact on the Fund. Investments in depository receipts may be less liquid and more volatile than the underlying shares in their primary trading market.

Risk of Investment in Other Pools: If the Fund invests in another pooled investment vehicle, it is exposed to the risk that the other pool will not perform as expected and is exposed indirectly to all of the risks applicable to an investment in such other pool. The investment policies of the other pool may not be the same as those of the Fund; as a result, an investment in the other pool may be subject to additional or different risks than those to which the Fund is typically subject. The Fund bears its proportionate share of the fees and expenses of any pool in which it invests. The Adviser or an affiliate may serve as investment adviser to a pool in which the Fund may invest, leading to potential conflicts of interest. It is possible that other clients of the Adviser or its affiliates will purchase or sell interests in a pool sponsored or managed by the Adviser or its affiliates at prices and at times more favorable than those at which the Fund does so.

Small-Capitalization Securities Risk: The securities of small-capitalization companies may be more volatile and may involve more risk than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies, and may depend on a few key employees. In addition, these companies may have been recently organized and may have little or no track record of success. The securities of smaller companies may trade less frequently and in smaller volumes than more widely held securities. Some securities of smaller issuers may be illiquid or may be restricted as to resale, and their values may have significant volatility. The Fund may be unable to liquidate its positions in such securities at any time, or at a favorable price, in order to meet the Fund's obligations. Returns on investments in securities of small-capitalization companies could trail the returns on investments in securities of larger companies.

Unconstrained Sector Risk: The Fund may invest a substantial portion of its assets within one or more economic sectors or industries, which may change from time to time. Greater investment focus on one or more sectors or industries increases the potential for volatility and the risk that events negatively affecting such sectors or industries could reduce returns, potentially causing the value of the Fund's Shares to decrease, perhaps significantly.

Valuation Risk: Some portfolio holdings, potentially a large portion of the Fund's investment portfolio, may be valued on the basis of factors other than market quotations. This may occur more often in times of market turmoil or reduced liquidity. There are multiple methods that can be used to value a portfolio holding when market quotations are not readily available. The value established for any portfolio holding at a point in time might differ from what would be produced using a different methodology or if it had been priced using market quotations. Portfolio holdings that are valued using techniques other than market quotations, including "fair valued" securities, may be subject to greater fluctuation in their valuations from one day to the next than if market quotations were used. In addition, there is no assurance that the Fund could sell or close out a portfolio position for the value established for it at any time, and it is possible that the Fund would incur a loss because a portfolio position is sold or closed out at a discount to the valuation established by the Fund at that time. Investors who purchase or redeem Fund Shares on days when the Fund is holding fair-valued investments may receive fewer or more shares or lower or higher redemption proceeds than they would have received if the Fund had not fair-valued the holding(s) or had used a different valuation methodology.

Volatility Risk: Because the Fund seeks to exhibit relative low volatility and excess returns as compared to the Index over the long term, both its portfolio investments and its returns may differ, potentially greatly, from those of the Index. There can be no assurance that the Fund will in fact experience lower volatility than the Index nor can there be any assurance that the Fund will produce returns in excess of the benchmark. The application of the Adviser's active stock selection model may lead to a degree of added risk in exchange for the potential outperformance relative to the Index. Because the Fund is managed to limit volatility, it is likely that in periods of rapidly rising markets the Fund will experience less favorable returns than the Index.

State Street Disciplined Emerging Markets Equity Fund

Summary Prospectus – December 19, 2018

Class A SSELX

Class I SSEOX

Class K SSEQX

Performance

The bar chart and table below provide some indication of the risks of investing in the Fund by illustrating the variability of the Fund's returns from year-to-year and by showing how the Fund's average annual returns for the periods ended December 31, 2017 compared with those of the Index. The bar chart shows how the Class A shares' returns have varied for each full calendar year shown. The effect of sales charges, applicable to Class A shares only, is not reflected in the bar chart; if these amounts were reflected, returns would be lower. For periods prior to July 7, 2014, the inception date for Class A, I and K shares, the performance information shown is that of the Class N shares of the Fund (which are offered in a separate prospectus), adjusted to reflect the higher class-related operating fees and expenses of Class A shares. Except for differences in returns resulting from differences in fees and expenses, all share classes would have substantially similar returns because all share classes invest in the same portfolio of securities. Returns would differ only to the extent that the Class A, Class I and Class K share classes do not have the same expenses as Class N shares. Class A shares are generally expected to incur higher expenses, and Class I and K shares are generally expected to incur lower expenses, than Class N shares. On or about December 18, 2015, the Fund adopted its current principal investment strategy. Performance information for periods before this date reflect the operation of the Fund pursuant to a different emerging markets equity investment strategy. The Fund's past performance does not necessarily indicate how the Fund will perform in the future. Current performance information for the Fund is available toll free by calling (800)-997-7327 or by visiting our website at www.ssgafunds.com.

Annual Total Returns (years ended 12/31)*

Highest Quarterly Return: 31.20% (Q2, 2009)

Lowest Quarterly Return: -29.97% (Q3, 2008)

* As of 09/30/2018, the Fund's Calendar Year-To-Date return was -4.62%.

Average Annual Total Returns (for periods ended 12/31/17)

	One Year	Five Years	Ten Years	Inception Date
Class A				7/7/2014
Return Before Taxes	21.84%	-1.20%	-2.33%	
Return After Taxes on Distributions	20.65%	-4.52%	-4.11%	
Return After Taxes on Distributions and Sale of Fund Shares	13.81%	-0.93%	-1.56%	
Class I	28.84%	0.10%	-1.63%	7/7/2014
Class K	28.81%	0.18%	-1.59%	7/7/2014
MSCI Emerging Market Index (reflects no deduction for fees, expenses or taxes other than withholding taxes on reinvested dividends)	37.28%	4.35%	1.68%	

The returns for certain periods would have been lower without the effect of a contractual fee waiver and/or reimbursement.

Fund returns after taxes on distributions and sale of Fund Shares may be higher than returns before taxes and/or returns after taxes on distributions for certain periods because they reflect the tax benefit an investor may receive as a result of the capital losses that would have been incurred on the sale of Fund Shares or due to the effect of foreign tax credits.

State Street Disciplined Emerging Markets Equity Fund

Summary Prospectus – December 19, 2018

Class A SSELX

Class I SSEOX

Class K SSEQX

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. After-tax returns depend on an investor's tax situation and may differ from those shown below, and after-tax returns are not relevant to investors who hold their shares through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts (IRAs). After-tax returns are shown for Class A only and after-tax returns for other share classes will vary. For periods prior to July 7, 2014, the inception date for Class A shares, the performance information shown is that of the Class N shares of the Fund, adjusted to reflect the higher class-related operating fees and expenses of Class A shares. For periods prior to July 7, 2014, the inception date for Class I and K shares, the performance information shown is that of the Class N shares of the Fund. Except for differences in returns resulting from differences in fees, expenses, and sales charges (as applicable), all share classes would have substantially similar returns because all share classes invest in the same portfolio of securities.

Investment Adviser

SSGA FM serves as the investment adviser to the Fund.

Chris Laine and Chee Ooi serve as portfolio managers of the Fund. They have served on the Fund since 2007 and 2016, respectively.

Purchase and Sale of Fund Shares

The Fund's initial and subsequent investment minimums generally are as follows, although the Fund may reduce or waive the minimums in some cases.

Class A	
To establish an account	\$2,000
To add to an existing account	None
Class I	
To establish an account	\$1,000,000
To add to an existing account	None
Class K	
To establish an account	\$10,000,000
To add to an existing account	None

You may purchase or redeem Fund Shares on any day the Fund is open for business.

Written Requests and Wire Transfers. You may purchase or redeem Fund Shares by written request or wire transfer.

Written requests should be sent to:

By Intermediary:

If you wish to purchase or redeem Fund Shares through a broker, bank or other financial intermediary (“Financial Intermediary”), please contact that Financial Intermediary directly. Your Financial Intermediary may have different or additional requirements for opening an account and/or for the processing of purchase and redemption orders, or may be closed at times when the Fund is open. Financial Intermediaries may contact DST Asset Manager Solutions, Inc. at (877) 332-6207 or via email at nsccresearch@dstsystems.com with questions.

Tax Information

For mutual funds generally, dividends from net investment income (other than qualified dividend income) and distributions of net short-term capital gains are taxable to you as ordinary income under U.S. federal income tax laws whether paid in cash or in additional shares. Distributions from net long-term gains are taxable as long-term taxable gains regardless of the length of time you have held the shares and whether you were paid in cash or additional shares. Dividend and capital gains distributions that you receive, as well as your gains or losses from any sale or exchange of Fund Shares, may be subject to state and local income taxes. If you hold the shares through a tax-advantaged arrangement, you generally will be taxed only upon withdrawal of monies from the arrangement.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund Shares through a broker-dealer or other Financial Intermediary (such as a bank), the Fund, the Adviser or its affiliates may pay the Financial Intermediary for certain activities related to the Fund, including educational training programs, conferences, the development of technology platforms and reporting systems, or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your Financial Intermediary’s website for more information.
