

Fund Objective

The State Street Disciplined Global Equity Fund (the "Disciplined Global Equity Fund" or the "Fund") seeks to provide competitive long-term returns while maintaining low long-term volatility relative to the broad global equity market.

Process

In seeking to identify stocks offering the potential for capital growth, the Adviser employs a proprietary quantitative process. The process evaluates the relative attractiveness of eligible securities based on the correlation of certain historical economic and financial factors (such as measures of growth potential, valuation, quality and investor sentiment), and other historical quantitative metrics. Additionally, the process may incorporate an element designed to evaluate the macroeconomic environment and prevailing market conditions. The process is intended to allow the Adviser to evaluate eligible securities and then rank eligible securities in the Fund's investment universe in the order of their attractiveness as potential Fund investments.

Key Features

- Team based decision making by experienced investment professionals
- Returns pursued through a proprietary quantitative process

Total Return

Cumulative	Fund at NAV	MSCI World Index

30 Day SEC Yield (Unsubsidized)	-2.61%
Maximum Sales Charge	0.00%

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit ssgafunds.com for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index.

Performance vs Benchmark

[^]The Fund's investment adviser, SSGA Funds Management, Inc. is contractually obligated until April 30, 2019 (i) to waive up to the full amount of the advisory fee payable by the Fund, and/or (ii) to reimburse the Fund for expenses to the extent that Total Annual Fund Operating Expenses (exclusive of non-recurring account fees, extraordinary expenses, acquired fund fees and distribution, shareholder servicing, and sub-transfer agency fees) exceed 0.75% of average daily net assets on an annual basis. This waiver and/or reimbursement may not be terminated prior to April 30, 2019 except with approval of the Fund's Board of Trustees.

Definitions: NAV is the market value of a mutual fund's and ETFs total assets, minus liabilities, divided by the number of shares outstanding. **Price/Earnings Ratio FY1** is the closing price divided by the sum of the forecasted fiscal year earnings per share. **Price/Book Ratio** is the current market price of the stock divided by the most recently reported book value for the prior fiscal year.

Important Risk Information:

Quantitative investing assumes that future performance of a security relative to other securities may be predicted based on historical economic and financial factors, however, any errors in a model used might not be detected until the fund has sustained a loss or reduced performance related to such errors.

Low volatility funds can exhibit relative low volatility and excess returns compared to the Index over the long term; both portfolio investments and returns may differ from those of the Index. The fund may not experience lower volatility or provide returns in excess of the Index and may provide lower returns in periods of a rapidly rising market. Active stock selection may lead to added risk in exchange for the potential outperformance relative to the Index.

Investments in **mid-sized companies** may involve greater risks than those in larger, better known companies, but may be less volatile than investments in smaller companies.

Foreign (non-U.S.) Securities may be subject to greater political, economic, environmental, credit and information risks. Foreign securities may be subject to higher volatility than U.S. securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets.

Equity securities may fluctuate in value in response to the activities of individual companies and general market and economic conditions.
