

# STATE STREET

## INSTITUTIONAL INVESTMENT TRUST

### State Street Defensive Global Equity Fund

### Class A (SSGGX) Class I (SSGMX) Class K (SSGKX)

#### Summary Prospectus – April 30, 2020

Before you invest, you may want to review the fund’s prospectus, which contains more information about the fund and its risks. You may find the fund’s prospectus and other information about the fund online at:

<http://www.ssgafunds.com>

You may also get this information at no cost by calling (800) 647-7327, by sending an e-mail request to [Fund\\_Inquiry@ssga.com](mailto:Fund_Inquiry@ssga.com), or by writing to the fund, c/o State Street Global Advisors Funds Distributors, LLC, One Iron Street, Boston, Massachusetts 02210. The fund’s current prospectus and statement of additional information are incorporated by reference into this summary prospectus.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Fund’s annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund (or from your financial intermediary, such as a broker-dealer or bank). Instead, the reports will be made available on the Fund’s website ([www.ssgafunds.com](http://www.ssgafunds.com)), and you will be notified by mail each time a report is posted, and provided with a website link to access the report. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Funds electronically by calling (800) 647-7327.

You may elect to receive all future reports in paper free of charge. If you invest through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. If you invest directly with a Fund, you can inform the Fund that you wish to continue receiving paper copies of your shareholder reports by calling (800) 647-7327. Your election to receive reports in paper will apply to all funds held in your account.

#### Investment Objective

The State Street Defensive Global Equity Fund (the “Defensive Global Equity Fund” or the “Fund”) seeks to provide competitive long-term returns while maintaining low long-term volatility relative to the broad global equity market.

#### Fees and Expenses of the Fund

The tables below describe the fees and expenses that you may pay if you buy and hold shares of the Fund (“Fund Shares”). You may qualify for sales charge discounts on purchases of Class A shares if you agree to invest in the future, or if you and your family currently invest, at least \$50,000 in State Street Funds that offer Class A shares. More information about these and other discounts is available from your financial professional and in Choosing a Share Class – Reducing Your Class A Sales Charge on page 22 of the Fund’s Prospectus. The expenses shown in the table and the Example reflect the expenses of the Fund and the Fund’s proportionate share of the expenses of State Street Defensive Global Equity Portfolio (the “Defensive Global Equity Portfolio” or sometimes referred to in context as the “Portfolio”).

#### Shareholder Fees (fees paid directly from your investment)

	<u>Class A</u>	<u>Class I</u>	<u>Class K</u>
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.25%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of the sale proceeds or the original offering price)	None <sup>1</sup>	None	None

**Annual Fund Operating Expenses** (expenses that you pay each year as a percentage of the value of your investment)

	<u>Class A</u>	<u>Class I</u>	<u>Class K</u>
Management Fee	0.75%	0.75%	0.75%
Distribution and/or Shareholder Service (12b-1) Fees	0.25%	0.00%	0.00%
Other Expenses <sup>2</sup>	6.57%	6.57%	6.37%
Total Annual Fund Operating Expenses	<u>7.57%</u>	<u>7.32%</u>	<u>7.12%</u>
Less Fee Waivers and/or Expense Reimbursements <sup>3</sup>	(6.37)%	(6.37)%	(6.37)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements	<u>1.20%</u>	<u>0.95%</u>	<u>0.75%</u>

<sup>1</sup> A contingent deferred sales charge (“CDSC”) of 1.00% may be assessed on redemptions of Class A shares made within 18 months after purchase where no initial sales charge was paid at the time of purchase as part of an investment of \$1,000,000 or more.

<sup>2</sup> Other Expenses are based on estimates for the current fiscal year for Class A and Class K shares and have been restated to reflect current fees for Class I shares.

<sup>3</sup> The Fund’s investment adviser, SSGA Funds Management, Inc. (the “Adviser” or “SSGA FM”), is contractually obligated until April 30, 2021 (i) to waive up to the full amount of the advisory fee payable by the Fund, and/or (ii) to reimburse the Fund to the extent that Total Annual Fund Operating Expenses (exclusive of non-recurring account fees, interest, taxes, extraordinary expenses, acquired fund fees and distribution, shareholder servicing, and sub-transfer agency fees) exceed 0.75% of average daily net assets on an annual basis. This waiver and/or reimbursement may not be terminated prior to April 30, 2021 except with approval of the Fund’s Board of Trustees.

**Example:**

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, and then sell or hold all of your Fund Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The calculation of costs for the one-year period takes into account the effect of any current contractual fee waivers and/or reimbursements; and the calculation of costs for the remaining periods takes such fee waivers and/or reimbursements into account only for the first year of each such period. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>	<u>10 years</u>
Class A	\$641	\$2,092	\$3,469	\$6,615
Class I	\$ 97	\$1,585	\$3,005	\$6,276
Class K	\$ 77	\$1,530	\$2,922	\$6,153

**Portfolio Turnover:**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). As a shareholder of the Defensive Global Equity Portfolio the Fund bears its ratable share of the transaction costs associated with the portfolio turnover of the Portfolio. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 55% of the average value of its portfolio.

**Principal Investment Strategies**

Under normal circumstances, the Fund will invest at least 80% of its net assets (plus borrowings, if any, for investment purposes) in equity securities. The Fund will provide shareholders with at least sixty (60) days’ notice prior to any change in its 80% policy. The notional value of the Fund’s investments in derivatives or other synthetic instruments that provide exposure comparable, in the judgment of the Adviser, to the foregoing types of investments may be counted toward satisfaction of the Fund’s 80% policy. SSGA Funds Management, Inc. (“SSGA FM” or the “Adviser”), the investment adviser to the Fund, seeks to select a portfolio of securities that it expects over the long term to exhibit low volatility both in absolute terms and in comparison with the MSCI World Index (the “Index”) and provide competitive returns as compared with the Index.

In seeking to identify stocks offering the potential for capital growth, the Adviser employs a proprietary quantitative process. The process evaluates the relative attractiveness of eligible securities based on the correlation of certain historical economic and financial factors (such as measures of growth potential, valuation, quality and investor sentiment), and other historical quantitative metrics. Additionally, the process may incorporate an element designed to evaluate the macroeconomic environment and prevailing market conditions. The process is intended to allow the Adviser to evaluate eligible securities and then rank eligible securities in the Fund's investment universe in the order of their attractiveness as potential Fund investments.

The Adviser also uses a quantitative analysis to determine the expected volatility of a stock's market price. Volatility is a statistical measurement of up and down fluctuations in the value of a security over time. Volatility may result in rapid and dramatic price swings. The Adviser seeks to favor securities with low exposure to market risk factors and low security-specific risk. In determining the exposure of a security to such risk factors, the Adviser may take into account, among other things, such considerations as a security's market capitalization, its price momentum, the security's valuation, the liquidity of the security, the degree to which the issuer is leveraged, and the issuer's growth prospects. The Adviser also implements risk constraints at the overall portfolio level by periodic testing of the portfolio's composition against proprietary risk models, focusing on such factors as industry and sector exposures, portfolio diversification levels, market capitalization exposure, and geographic exposures.

Through these quantitative processes of security selection and portfolio diversification, the Adviser expects that the portfolio will be subject to a relatively low level of absolute risk (as defined by statistical measures of volatility, such as standard deviation of returns) and that the portfolio should exhibit relatively low volatility compared with the Index over the long term. The Adviser will make changes over time in the Fund's portfolio to reflect changes in the various risk factors described above. From time to time, the Adviser may make a qualitative judgment not to implement fully the results of the quantitative investment process if it believes that the process did not take into account all of the information relevant to a particular investment or the Fund's portfolio in the aggregate, or that a different investment might be more appropriate.

*Although the Fund pursues a defensive style of investing and targets a low level of volatility in absolute terms and in comparison to the Index, there is no assurance that the Fund will outperform the Index during market downturns or achieve its target volatility, and the Fund may be subject to significant changes in value over short or longer timeframes. There also can be no assurance that the Fund will produce returns in excess of the Index.*

The Fund will generally invest at least 40% of its assets in securities of issuers economically tied to countries other than the United States and will generally hold securities of issuers economically tied to at least three countries, including the United States. The Fund will generally consider an investment in an issuer to be tied to a particular country if (i) the issuer is organized in such country or maintains a principal place of business in such country; (ii) the issuer's securities are traded principally in such country; or (iii) during the issuer's most recent fiscal year, it derived at least 50% of its revenues or profits from goods produced or sold, investments made, or services performed in such country or has at least 50% of its assets in such country.

The Fund expects to invest primarily in common stocks. The Fund may purchase securities in their initial public offerings, and may hold securities that are restricted as to resale. The Fund may invest in other investment companies, including exchange-traded funds, to the extent permitted by applicable law (including those advised by the Adviser). The Fund may hold a portion of its assets in cash and cash instruments. While the Fund may invest in companies of any market capitalization, it expects to primarily invest in large capitalization companies. The Fund may invest in derivatives, such as futures contracts, in order to gain broad equity market exposures pending investments of cash, or to reduce market exposures pending the sales of securities. The Fund reserves the right to enter into foreign currency futures and forward contracts to hedge currency risk, although the Adviser does not currently anticipate that such transactions will play any significant role in the investment process.

The Fund seeks to achieve its investment objective by investing substantially all of its investable assets in the Defensive Global Equity Portfolio, which has substantially identical investment policies to the Fund. When the Fund invests in this "master-feeder" structure, the Fund's only investments are shares of the Portfolio and it participates in the investment returns achieved by the Portfolio. Descriptions in this section of the investment activities of the "Fund" also generally describe the expected investment activities of the Portfolio.

## **Principal Risks**

The Fund is subject to the following principal risks. You could lose money by investing in the Fund. Certain risks relating to instruments and strategies used in the management of the Fund are placed first. The significance of any specific risk to an investment in the Fund will vary over time, depending on the composition of the Fund's portfolio, market conditions, and other factors. You should read all of the risk information presented below carefully, because any one or more of these risks may result in losses to the Fund. **An investment in the Fund is subject to investment risks, including possible loss of principal, is not a deposit in a bank and is not**

**insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.** The Fund may not achieve its investment objective. The Fund is not intended to be a complete investment program, but rather is intended for investment as part of a diversified investment portfolio. Investors should consult their own advisers as to the role of the Fund in their overall investment programs.

**Market Risk:** The Fund's investments are subject to changes in general economic conditions, general market fluctuations and the risks inherent in investment in securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, changes in the actual or perceived creditworthiness of issuers, and general market liquidity. The Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, or other events could have a significant impact on the Fund and its investments.

**Equity Investing Risk:** The market prices of equity securities owned by the Fund may go up or down, sometimes rapidly or unpredictably. The value of a security may decline for a number of reasons that may directly relate to the issuer and also may decline due to general industry or market conditions that are not specifically related to a particular company. In addition, equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

**Non-U.S. Securities Risk:** Non-U.S. securities (including depositary receipts) are subject to political, regulatory, and economic risks not present in domestic investments. There may be less information publicly available about a non-U.S. entity than about a U.S. entity, and many non-U.S. entities are not subject to accounting, auditing, legal and financial report standards comparable to those in the United States. Further, such entities and/or their securities may be subject to risks associated with currency controls; expropriation; changes in tax policy; greater market volatility; differing securities market structures; higher transaction costs; and various administrative difficulties, such as delays in clearing and settling portfolio transactions or in receiving payment of dividends. Securities traded on foreign markets may be less liquid (harder to sell) than securities traded domestically. Foreign governments may impose restrictions on the repatriation of capital to the U.S. In addition, to the extent that the Fund buys securities denominated in a foreign currency, there are special risks such as changes in currency exchange rates and the risk that a foreign government could regulate foreign exchange transactions. In addition, to the extent investments are made in a limited number of countries, events in those countries will have a more significant impact on the Fund. Investments in depositary receipts may be less liquid and more volatile than the underlying shares in their primary trading market.

**Currency Risk:** The value of the Fund's assets may be affected favorably or unfavorably by currency exchange rates, currency exchange control regulations, and delays, restrictions or prohibitions on the repatriation of foreign currencies. Foreign currency exchange rates may have significant volatility, and changes in the values of foreign currencies against the U.S. dollar may result in substantial declines in the values of the Fund's assets denominated in foreign currencies.

**Geographic Focus Risk:** The performance of a fund that is less diversified across countries or geographic regions will be closely tied to market, currency, economic, political, environmental, or regulatory conditions and developments in the countries or regions in which the fund invests, and may be more volatile than the performance of a more geographically-diversified fund.

**Counterparty Risk:** The Fund will be subject to credit risk with respect to the counterparties with which the Fund enters into derivatives contracts, repurchase agreements, reverse repurchase agreements, and other transactions. If a counterparty fails to meet its contractual obligations, the Fund may be unable to terminate or realize any gain on the investment or transaction, or to recover collateral posted to the counterparty, resulting in a loss to the Fund. If the Fund holds collateral posted by its counterparty, it may be delayed or prevented from realizing on the collateral in the event of a bankruptcy or insolvency proceeding relating to the counterparty.

**Currency Hedging Risk:** If the Fund enters into currency hedging transactions, any loss generated by those transactions generally should be substantially offset by gains on the hedged investment, and vice versa. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains. Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective.

**Derivatives Risk:** Derivative transactions can create investment leverage and may have significant volatility. It is possible that a derivative transaction will result in a much greater loss than the principal amount invested, and the Fund may not be able to close out a derivative transaction at a favorable time or price. The counterparty to a derivatives contract may be unable or unwilling to make timely settlement payments, return the Fund's margin, or otherwise honor its obligations. A derivatives transaction may not behave in the manner anticipated by the Adviser or may not have the effect on the Fund anticipated by the Adviser.

**Futures Contract Risks; Other Exchange-Traded Derivatives:** The risk of loss relating to the use of futures contracts and other exchange-traded derivatives is potentially unlimited. There is no assurance that a liquid secondary market on an exchange will exist for any particular futures contract or other exchange-traded derivative or at any particular time. In the event no such market exists for a particular derivative, it might not be possible to effect closing transactions, and the Fund will be unable to terminate its exposure to the derivative. If the Fund uses futures contracts or other exchange-traded derivatives for hedging purposes, there is a risk of imperfect correlation between movements in the prices of the derivatives and movements in the securities or index underlying the derivatives or movements in the prices of the Fund's investments that are the subject of such hedge. Certain foreign futures contracts and other exchange-traded derivatives may be less liquid and more volatile than U.S. contracts. The Fund may be delayed or prevented from recovering margin or other amounts deposited with a futures commission merchant or futures clearinghouse.

**Growth Stock Risk:** The prices of growth stocks may be based largely on expectations of future earnings, and their prices can decline rapidly and significantly in reaction to negative news. Growth stocks may underperform value stocks and stocks in other broad style categories (and the stock market as a whole) over any period of time and may shift in and out of favor with investors generally, sometimes rapidly, depending on changes in market, economic, and other factors.

**IPO Risk:** The Fund may at times have the opportunity to invest in securities offered in initial public offerings ("IPOs"). IPOs involve companies that have no public operating history and therefore entail more risk than established public companies. The prices of securities offered in IPOs can have significant volatility and the Fund may lose money on an investment in such securities. IPO investments in which other clients of the Adviser invest may not be made available to the Fund.

**Large-Capitalization Securities Risk:** Returns on investments in securities of large companies could trail the returns on investments in securities of smaller and mid-sized companies. Larger companies may be unable to respond as quickly as smaller and mid-sized companies to competitive challenges or to changes in business, product, financial, or other market conditions. Larger companies may not be able to maintain growth at the high rates that may be achieved by well-managed smaller and mid-sized companies.

**Large Shareholder Risk:** To the extent a large proportion of the shares of the Portfolio are held by a small number of shareholders (or a single shareholder), including funds or accounts over which the Adviser has investment discretion, the Portfolio is subject to the risk that these shareholders will purchase or redeem Portfolio shares in large amounts rapidly or unexpectedly, including as a result of an asset allocation decision made by the Adviser. These transactions could adversely affect the ability of the Portfolio to conduct its investment program.

**Leveraging Risk:** Use of leverage by the Fund may have the effect of increasing the volatility of the value of the Fund's portfolio, and may entail risk of loss in excess of the Fund's invested capital. To the extent the Fund uses leverage, the Fund's losses (and gains) may be greater than if the Fund had not used leverage.

**Liquidity Risk:** Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. In addition, the Fund, due to limitations on investments in any illiquid securities and/or the difficulty in purchasing and selling such investments, may be unable to achieve its desired level of exposure to a certain market or sector.

**Management Risk:** The Portfolio is actively managed. The Adviser's judgments about the attractiveness, relative value, or potential appreciation of a particular sector, security, commodity or investment strategy may prove to be incorrect, and may cause the Portfolio and, therefore, the Fund to incur losses. There can be no assurance that the Adviser's investment techniques and decisions will produce the desired results.

**Master/Feeder Structure Risk:** The Fund pursues its objective by investing substantially all of its assets in another pooled investment vehicle (a "master fund"). The ability of the Fund to meet its investment objective is directly related to the ability of the master fund to meet its investment objective. The Adviser serves as investment adviser to the master fund, leading to potential conflicts of interest. The Fund will bear its pro rata portion of the expenses incurred by the master fund. Substantial redemptions by other investors in a master fund may affect the master fund's investment program adversely and limit the ability of the master fund to achieve its objective.

**Modeling Risk:** The Adviser uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Adviser. There can be no assurance that

the models will behave as expected in all market conditions. In addition, computer programming used to create quantitative models, or the data on which such models operate, might contain one or more errors.

**Restricted Securities Risk:** The Fund may hold securities that have not been registered for sale to the public under the U.S. federal securities laws. There can be no assurance that a trading market will exist at any time for any particular restricted security. Limitations on the resale of these securities may have an adverse effect on their marketability, and may prevent the Fund from disposing of them promptly at reasonable prices. The Fund may have to bear the expense of registering the securities for resale and the risk of substantial delays in effecting the registration. Also, restricted securities may be difficult to value because market quotations may not be readily available, and the securities may have significant volatility.

**Risk of Investment in Other Pools:** When the Fund invests in another pooled investment vehicle, it is exposed to the risk that the other pool will not perform as expected and is exposed indirectly to all of the risks applicable to an investment in such other pool. The investment policies of the other pool may not be the same as those of the Fund; as a result, an investment in the other pool may be subject to additional or different risks than those to which the Fund is typically subject. The Fund bears its proportionate share of the fees and expenses of any pool in which it invests. The Adviser or an affiliate may serve as investment adviser to a pool in which the Fund may invest, leading to potential conflicts of interest. It is possible that other clients of the Adviser or its affiliates will purchase or sell interests in a pool sponsored or managed by the Adviser or its affiliates at prices and at times more favorable than those at which the Fund does so.

**Unconstrained Sector Risk:** The Fund may invest a substantial portion of its assets within one or more economic sectors or industries, which may change from time to time. Greater investment focus on one or more sectors or industries increases the potential for volatility and the risk that events negatively affecting such sectors or industries could reduce returns, potentially causing the value of the Fund's Shares to decrease, perhaps significantly.

**Volatility Risk:** Because the Fund seeks to exhibit relative low volatility and excess returns as compared to the Index over the long term, both its portfolio investments and its returns may differ, potentially greatly, from those of the Index. There can be no assurance that the Fund will in fact experience lower volatility than the Index nor can there be any assurance that the Fund will produce returns in excess of the benchmark. The application of the Adviser's active stock selection model may lead to a degree of added risk in exchange for the potential outperformance relative to the Index. Because the Fund is managed to limit volatility, it is likely that in periods of rapidly rising markets the Fund will experience less favorable returns than the Index.

## Performance

The bar chart and table below provide some indication of the risks of investing in the Defensive Global Equity Fund by illustrating the variability of the Fund's returns from year-to-year and by showing how the Fund's average annual returns for the periods indicated compared with those of the Index. The bar chart shows how the Class I shares' returns have varied for each full calendar year shown. Except for differences in returns resulting from differences in fees and expenses, all share classes would have substantially similar returns because all share classes invest in the same portfolio of securities. The Fund's past performance does not necessarily indicate how the Fund will perform in the future. Current performance information for the Fund is available toll free by calling (800) 997-7327 or by visiting our website at [www.ssgafunds.com](http://www.ssgafunds.com).

### Annual Total Return (years ended 12/31)

Highest Quarterly Return: 9.90% (Q1, 2019)

Lowest Quarterly Return: -9.81% (Q4, 2018)

### Average Annual Total Returns (for periods ended 12/31/19)

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. After-tax returns depend on an investor's tax situation and may differ from those shown below, and after-tax returns are not relevant to investors who hold their shares through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts ("IRAs"). Except for differences in returns resulting from differences in fees, expenses, and sales charges (as applicable), all share classes would have substantially similar returns because all share classes invest in the same portfolio of securities.

	<u>One Year</u>	<u>Since Inception</u>	<u>Inception Date</u>
Class I			2/18/2016
Return Before Taxes	19.42%	10.87%	
Return After Taxes on Distributions	11.59%	7.80%	
Return After Taxes on Distributions and Sale of Fund Shares	17.06%	8.27%	
MSCI World Index (reflects no deduction for fees, expenses or taxes other than withholding taxes on reinvested dividends)	27.67%	13.80%	

The Fund will make updated performance information, including its current net asset value, available at the Fund's website: [www.ssgafunds.com](http://www.ssgafunds.com).

### Investment Adviser

SSGA FM serves as the investment adviser to the Fund and the Portfolio.

The professionals primarily responsible for the day-to-day management of the Fund are Chee Ooi and Adel Daghmouri, each of which has served as a portfolio manager of the Fund since inception in 2016.

Chee Ooi is a Managing Director of the Adviser and a Senior Portfolio Manager in the Active Quantitative Equity Group. He joined the Adviser in 2008.

Adel Daghmouri is a Vice President of the Adviser and a Senior Portfolio Manager in the Active Quantitative Equity Group. He joined the Adviser in 1998.

### Purchase and Sale of Fund Shares

#### Purchase Minimums

<b>Class A</b>		
To establish an account		\$2,000
To add to an existing account		None
<b>Class I</b>		
To establish an account		None
To add to an existing account		None
<b>Class K</b>		
To establish an account		None
To add to an existing account		None

You may purchase or redeem Fund Shares on any day the Fund is open for business.

*Written Requests and Wire Transfers.* You may purchase or redeem Fund Shares by written request or wire transfer.

Written requests should be sent to:

#### By Mail:

State Street Funds  
P.O. Box 219737  
Kansas City, MO 64121-9737

#### By Overnight/Registered, Express, Certified Mail:

State Street Funds  
430 W 7<sup>th</sup> Street Suite 219737  
Kansas City, MO 64105-1407

By Intermediary:

If you wish to purchase or redeem Fund Shares through a broker, bank or other financial intermediary (“Financial Intermediary”), please contact that Financial Intermediary directly. Your Financial Intermediary may have different or additional requirements for opening an account and/or for the processing of purchase and redemption orders, or may be closed at times when the Fund is open. Financial Intermediaries may contact DST Asset Manager Solutions, Inc. at (877) 332-6207 or via email at [nsc cresearch@dtsystems.com](mailto:nsc cresearch@dtsystems.com) with questions.

**Tax Information**

The Fund’s distributions are expected to be taxed as ordinary income, qualified dividend income and/or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or individual retirement account. Any withdrawals made from such tax-advantaged arrangement may be taxable to you.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase Fund Shares through a broker-dealer or other Financial Intermediary (such as a bank), the Adviser or its affiliates may pay the Financial Intermediary for certain activities related to the Fund, including educational training programs, conferences, the development of technology platforms and reporting systems, or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your Financial Intermediary’s website for more information.
