

**Fund Objective**

The State Street Dynamic Small Cap Fund (the "Fund") seeks to maximize the total return through investment in equity securities.

**Process**

The Fund's management team uses a proprietary quantitative multi-factor stock-selection model. The model evaluates the relative attractiveness of each eligible security based on the correlation of certain historical economic and financial factors (such as measures of growth potential, valuation, quality and investor sentiment), and other historical quantitative metrics. The quantitative model allows the adviser to evaluate quickly each eligible security and then rank all eligible securities in the fund's investment universe in the order of their attractiveness as fund investments. The adviser also regularly reexamines the model and may make updates and adjustments to the economic and financial conditions and other quantitative metrics considered, and to the weightings among them. The Fund will invest primarily in a portfolio of smaller domestic companies. The Fund's management team monitors the overall risk of the Fund, in order to avoid unintended risk relative to the Index. SSGA attempts to manage risk by, among other things, monitoring industry and sector weights and deviations from the Index, and maintaining a well-diversified portfolio.

**Key Features**

- Team based decision making by experienced investment professionals
- Systematic evaluation of macro environment allows for an adaptive and more responsive modeling process
- On-going research that adds value to the investment process

**Performance vs Benchmark**

POP Performance shown for the periods prior to the inception of Class A shares on July 7, 2014 reflects the historical performance of the fund's Class N shares adjusted to reflect the higher expenses of Class A shares, estimated for their first year of operations, including applicable 12b-1 fees and the maximum sales load of Class A. NAV Performance shown for the periods prior to the inception of Class A shares on July 7, 2014 reflects the historical performance of the fund's Class N shares adjusted to reflect the higher expenses of Class A shares, estimated for their first year of operations, including applicable 12b-1 fees. A contingent deferred sales charge ("CDSC") of 1.00% may be assessed on redemptions of Class A shares made within 18 months after purchase where no initial sales charge was paid at the time of purchase as part of an investment of \$1,000,000 or more.

<sup>^</sup>The Fund's investment adviser, SSGA Funds Management, Inc. (the "Adviser" or "SSGA FM"), is contractually obligated until December 31, 2019 (i) to waive up to the full amount of the advisory fee payable by the Fund, and/or (ii) to reimburse the Fund to the extent that Total Annual Fund Operating Expenses (exclusive of non-recurring account fees, extraordinary expenses, acquired fund fees and expenses, and distribution, shareholder servicing and sub-transfer agency fees) exceed 0.85% of average daily net assets on an annual basis. This waiver and/or reimbursement may not be terminated prior to December 31, 2019 except with the approval of the Fund's Board of Trustees. SSGA FM has contractually agreed to waive 0.01% of its administration fee. This waiver may not be terminated or modified except with the approval of the Fund's Board of Trustees.

**Definitions:** NAV is the market value of a mutual fund's and ETFs total assets, minus liabilities, divided by the number of shares outstanding. **Price/Earnings Ratio FY1** is the closing price divided by the sum of the forecasted fiscal year earnings per share. **Price/Book Ratio** is the current market price of the stock divided by the most recently reported book value for the prior fiscal year. **Public Offering Price (POP)** is equal to a Fund's Net Asset Value plus sales charges, if any. As with the Net Asset Value, the public offering price (POP) will typically change on a day to day basis.

**Important Risk Information:**

**Derivative investments** may involve risks such as potential illiquidity of the markets and additional risk of loss of principal.

These investments may have difficulty in liquidating an investment position without taking a significant discount from current market value, which can be a significant problem with certain **lightly traded securities**.

**Value stocks** can perform differently from the market as a whole. They can remain undervalued by the market for long periods of time.

**Small company issues** can be subject to increased volatility and considerable price fluctuations.

Investments in **small-sized companies** may involve greater risks than in those of larger, better known companies. Returns on investments in stocks of small companies could trail the returns on investments in stocks of larger companies.

Investments in **mid-sized companies** may involve greater risks than those in larger, better known companies, but may be less volatile than investments in smaller companies.

**Equity securities** may fluctuate in value in response to the activities of individual companies and general market and economic conditions.
