Declaration date is the date on which a Fund announces an upcoming dividend payment.

Record Date is the date on which a Fund reviews its books to determine its "shareholders of record." Investors listed as shareholders of record on this date will receive the Fund's dividend payment.

Ex-dividend date is the day on which all shares bought and sold no longer come attached with the right to receive the most recently declared dividend.

Payable date is the date on which a Fund pays a dividend to its shareholders of record.

There is no guarantee that the stocks in the portfolio will continue to declare dividends and if they do, that they will remain at current levels or increase over time.

SSGA Target Date Funds are designed for investors expecting to retire around the year indicated in each fund's name. When choosing a Fund, investors should consider whether they anticipate retiring significantly earlier or later than age 65, even if such investors retire on or near a fund's approximate target date. There may be other considerations relevant to Target Date Fund selection and investors should select the fund that best meets their individual circumstances and investment goals. The funds' asset allocation strategy becomes increasingly conservative as it approaches the target date and beyond. The investment risks of each Target Date Fund change over time as its asset allocation changes.
